***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I. Claims 1-31, embracing a method of using a suitable concentration of HAS effective to stabilize and/or enhance a recombinant Ad vector at a temperature above the freezing point of water.

Group II. Claim 32, embracing a method for stabilizing an adenovirus vector at about 20° C, wherein materially distinct steps are employed, Dulbecco's phosphate buffered saline, from about 5% TO 15% glycerol, from about 0.25 to 2.0 mM CaCl<sub>2</sub>, and from about 0.1 to 1.0 mM MgCl<sub>2</sub>.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Group I claims require HSA which is main technical feature for the make and use of the method, whereas

Art Unit: 1632

Group II claims embraces materially distinct steps for the make and use of the method, e.g., Dulbecco's phosphate buffered saline, from about 5% TO 15% glycerol, from about 0.25 to 2.0 mM CaCl<sub>2</sub>, and from about 0.1 to 1.0 mM MgCl<sub>2</sub>.

Should Group I be elected, a species restriction is required under 35 U.S.C. 121 and 372.

This application contains claims directed to more than one species of the generic invention.

These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- (a) A specifically claimed concentration of HAS as listed in claims 2-5, for example.
- (b) A specifically named pH as listed in claims 6-13, for example;

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Each of the species that is listed above or claimed does not share a substantially common structural feature in common with respect to their site of action. Thus, the requirement of unity of the invention is not fulfilled.

Art Unit: 1632

Applicant is required to elect a particular group and species even though this requirement is traversed. Note that the species election must be complete in order for the examiner to conduct any meaningful search of the elected species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner *Dave Nguyen* whose telephone number is **(703) 305-2024**.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, *Deborah Reynolds*, may be reached at **(703) 305-4051**.

Papers related to this application may be submitted to Group 1600 by facsimile transmission. Papers should be faxed to Group 1600 via the PTO Fax Center located in Crystal Mall 1. The faxing of such papers must conform with the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989). The CM1 Fax Center number is **(703) 305-7401**.

Any inquiry of a general nature or relating to the status of this application should be directed to the *Group receptionist* whose telephone number is **(703) 308-0196**.
